

VIDEO COMPUTER SYSTEM

¿YA HAS CONSTRUIDO HOY TU ATARI®?

Presentado en 1977, el ATARI® Video Computer System (VCS) trasladó el realismo y las emociones de los salones recreativos a los hogares, llegando a convertirse en uno de los sistemas de videojuegos más populares de la historia, con 30 millones de unidades vendidas. Esta versión LEGO® del ATARI® Video Computer System recrea el inconfundible CX-2600A de 1980 equipado con cuatro interruptores. El modelo está repleto de detalles de gran realismo y joyas ocultas que te permitirán retroceder en el tiempo hasta los idílicos días de los videojuegos clásicos. Esperamos que lo disfrutes.

UN ICONO DE LOS VIDEOJUEGOS

Por increíble que parezca, el CX-2600A de cuatro interruptores, la versión más popular del ATARI® Video Computer System, celebra su 42 aniversario en 2022. Sentó las bases de los juegos de consola en su día y ATARI® sigue considerándolo el punto de partida a la hora de diseñar una consola retro.

HAVE YOU PLAYED ATARI TODAY ?

ATARI 50

50 AÑOS DE DIVERSIÓN

Fundada en 1972, ATARI® sobrevive como uno de los nombres más representativos del mundo de los videojuegos; más de medio siglo después, la marca sigue contando con seguidores y gozando de popularidad entre quienes buscan la emoción de los juegos retro. Con una amplia presencia en innumerables programas de televisión, en películas y en la cultura pop en general, ATARI® se ha convertido en un verdadero referente que va mucho más allá de sus orígenes en el ámbito de los videojuegos.

← El sistema de cartuchos permitía a los jugadores sumergirse en numerosos juegos diferentes

ATARI
THERE'S NO COMPARING IT WITH ANY OTHER VIDEO GAME.

Only ATARI makes the games the world wants most. Games that are innovative. Intense. Incredibly involving. And totally original.

The most games, the best games are only from ATARI. Atari makes more video game cartridges than anyone else.

Today ATARI Missile Command and Asteroids are the fastest selling home video games in the country.

MÁS JUEGOS. MÁS DIVERSIÓN.

A diferencia de otras muchas consolas anteriores que solo ofrecían un único juego integrado, ATARI® usaba un sistema de cartuchos que abría las puertas a una gama de juegos prácticamente ilimitada. Se publicaron un total de 527 juegos para el ATARI® Video Computer System, y éxitos como *Asteroids*, *Ms. Pac-Man* y *Pitfall* lo convirtieron en el sistema de juego imprescindible a finales de los 70 y principios de los 80.

1980 **ADVENTURE**

En este juego, que daría lugar a toda una generación de títulos de aventuras, un malvado mago roba el cáliz mágico de tu castillo y tienes que guiar a tu valiente caballero a través de terribles peligros para recuperarlo.

1981 **ASTEROIDS**

El objetivo de este juego, altamente adictivo, es alcanzar la máxima puntuación acabando con oleadas de asteroides, satélites y ovnis. Al alcanzarlos, los asteroides se rompen en trozos más pequeños y rápidos, ¡que salen volando en direcciones imprevisibles!

1982 **CENTIPEDE**

Usa la varita de la parte inferior de la pantalla para destruir tantos bichos como puedas. Tu némesis es un largo y sinuoso ciempiés que invade la pantalla. ¡Para avanzar en el juego y superar cada nivel, debes exterminar todos los segmentos que lo componen!

LA CONSTRUCCIÓN DE UN ICONO

Este modelo LEGO® de 2532 piezas es una fiel representación 1:1 del emblemático ATARI® Video Computer System de cuatro interruptores (modelo CX-2600A). Además de una réplica del mando, que se conecta a la parte trasera de la consola, cuenta con cuatro interruptores delanteros accionables. Incluye tres cartuchos

de populares juegos para el VCS, cada uno de ellos representado en una viñeta LEGO construable que ilustra la experiencia de juego que ofrecía. ¡Los juegos se pueden guardar en un genial portacartuchos de inspiración ochentera cuando no se estén usando!

EL ATARI® VIDEO COMPUTER SYSTEM

Entre 1977 y 1992 se lanzaron al mercado varias versiones del ATARI® Video Computer System que se diferenciaban principalmente por el peso, el número de interruptores o el acabado de la propia consola. La tecnología, impresionante

en su día, parece inconcebible en la actualidad, con una velocidad de procesamiento limitada a 1,19 MHz, una capacidad total de 128 B de memoria RAM soldada en la placa, ¡y cartuchos de juego con solo 4 kB de capacidad!

IMPRESIONES DEL EQUIPO DE DISEÑO

Como ávido aficionado a los juegos de consola clásicos y orgulloso propietario de un ATARI® Video Computer System original, trabajar en este proyecto coincidiendo con el 50 aniversario de ATARI fue un sueño hecho realidad. Una vez que decidimos la escala general y las características del modelo, fue cuestión de lograr que los pequeños detalles funcionaran: interruptores que se pudieran

activar y desactivar, un mando que se pareciera al original y se sintiera como tal, y una versión en ladrillos del clásico frente de madera de la consola. Por supuesto, no podíamos recrear los juegos en sí, pero decidimos incluir tres viñetas construibles para acercar a los aficionados a la experiencia de juego de los clásicos.

Chris McVeigh, diseñador de LEGO®

La escena oculta que emerge está llena de detalles inmediatamente reconocibles por cualquiera que haya crecido jugando a los videojuegos de los 80.
